I just wanted to let whomever it concerns know that I absolutely love my XM satellite radio and would never switch back to regular broadcasting after having it. I love being able to listen to not only great music but also instant weather and traffic. Its also nice to be able to travel to different states and not have to search through a ton of local stations to find the kind of music I like. I'd like to encourage you not to support the NAB's petition 04-160 and allow us to continue to enjoy our freedom of choice. Thanks for your time!Megan Stafford
